

Interior Facility Directory Systems

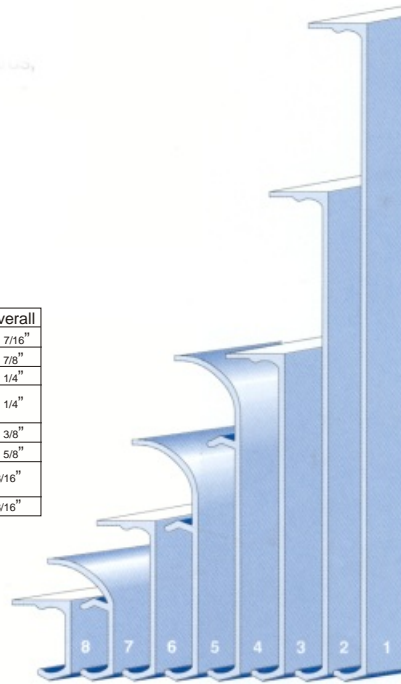

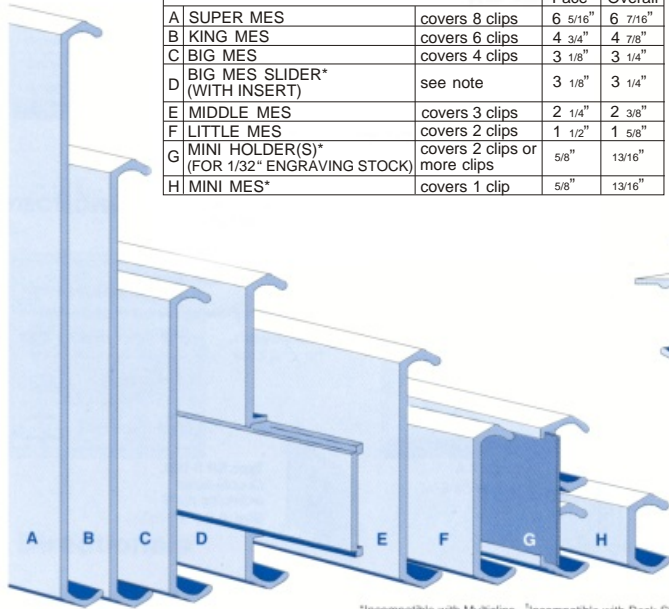

The MES sign and directory system is nothing short of a design classic. So simple, yet so versatile. You can create directional and informational systems to meet your customers needs, whether it be a small business office or a multi-national corporation, and since there are no standards, no two jobs need look the same.

Wall-mounted, projecting or suspended, the MES system does it all. From the reception desk to the shipping department, there's no better way - finding system. Available in silver, bronze, clear anodized, standard vinyl color, or acrylic polyurethane coated in any pantone matched color (matte, semi-gloss, or high gloss) or digital graphics.
